

Update Your BlackBerry with the Latest OS Enhancements

Get the most out of your BlackBerry Tour. Verizon Wireless is pleased to announce new software enhancements for your BlackBerry® Tour™ smartphone. The Research In Motion® (RIM®) 5.0.0 release 1002 (platform 4.2.0.272/applications 5.0.0.591) update will make using your BlackBerry Tour even more enjoyable. Verizon Wireless and RIM encourage you to upgrade to OS version 5.0 today.

Enjoy improved performance with the following updates.

- Camera
 - Smoother operation in both camera and video applications.
- Calling
 - Improved Bluetooth® functionality for last number dialed.
 - Enhanced functionality for Voice Activated Dialing in both French and English.
 - Improved missed call log now shows missed Call Waiting calls.
 - Upgraded Call Waiting caller ID and call timer.
- Messaging
 - Improved functionality for reading, sending, forwarding, and deleting SMS messages.
 - Corrected in-box display when device is used with a holster.
- Media
 - Better video streaming functionality.
 - Enhanced display for MMS messages containing both video and text.
 - Improved multitasking ability while streaming and downloading videos from www.youtube.com.
- Basic operations
 - Improved operation during charging.
 - Simplified key-lock functionality. A password is no longer needed unless a security timeout has occurred.
 - Improved GPS connectivity when using third-party mapping applications.
 - Push to Talk–capable.
